715 Data Terminal

Proven Data Collection Performer

Features:

- * Eliminates Manually Generated Time Card Data
- * Costs Less Than Other Automated Timekeeping Products
- * Links Directly To Your Existing Computer System
- * 8 Programmable Function Keys
- * Alphanumeric Keypad
- * Accept/Reject Tones
- * Signal Control for Bells and Access
- * Four Methods of Background Communications
- * Magnetic Stripe or Bar Code Reader
- * Data Input Validation
- * Supervisor Mode
- * Lockout Scheduling
- * Employee Messaging
- * Integrated Operational Battery Backup

Reset's TA715 Time & Data Terminal can record employee time, monitor productivity, control access and monitor inventory in a multitude of industries including restaurants, hospitals, health care facilities, banks, manufacturing, retail, hospitality, and many others.

The TA715 functions as a simple to use data collection point for employee information. It can be linked to a variety of existing computer networks in your organization to complement the management information systems you already have in place. By automating your data collection process, you can eliminate the manpower and mistakes associated with conventional time cards thereby reducing both payroll costs and errors.

The TA715 guarantees accurate, reliable input. Employees simply enter information through the TA715's keypad, by swiping a magnetic stripe or bar code badge. Employee feedback is provided through audible accept/reject tones and displayed messages.

Communication between the TA715 and your computer is accomplished by one of Time America's polling and programming utilities or integrated time and attendance systems. The TA715 automatically transfers data to your computer. In turn, the computer is used to program the TA715. Each of the TA715's 8 function keys can be programmed to ask up to four levels of information. Each piece of information can be validated and stored in the terminal's memory until requested by the host computer.
