Part Numbers

- 0059-32AC 230mm Quartz Battery Clock
- 0059-42AC 305mm Quartz Battery Clock

Description

Simplex battery-operated clocks are driven by an accurate quality Japanese quartz crystal regulated movement that is enclosed to keep out dust and dirt. It has a rear mounted on/off switch and manual setting knob for easy and accurate time setting and daylight savings changes.

Application

Simplex quartz clocks are recommended when it is impractical to install a synchronised clock system. They are housed in standard Simplex clock enclosures and are suitable for a wide variety of institutional, industrial, and educational applications.

Specifications

Crystal Accuracy: ± 20 Seconds/Month at Normal Temperature
Battery Type: 1 x Alkaline (AA) 1.5V (by others)
Battery Life: Over 1 Year
Weight: 230 mm 0.7 kg, 305 mm 1.0 kg
